● EXPERIENCE

FrontEnd Developer

Concise // June 19' - Current

- Role expanded to include building new features and fixing bugs with a heavy emphasis on Javascript and Handlebars.js for templating with exposure to React and Node.js
- Further developed jQuery and CSS skills in an agile environment.

Junior FrontEnd Developer

Concise // Sept 16' - June 19'

- Incorporated custom styling and branding for an existing conference web-app which required a good knowledge of responsive design, HTML, SASS/CSS, Bootstrap and jQuery.
- Spent 3 months in New York as the primary Front-End Developer for Concise in North America. Here, in addition to my normal role I was tasked with training a colleague transitioning from technician to developer.

● EDUCATION

edX Trilogy Bootcamp

Remote, 2023

Frontend bootcamp (5 months). HTML, CSS, JS, React, React-Testing and Node.js

General Assembly

Web Dev Intensive (3mo, full time) - London

First foray into web-dev as a career switcher, touched upon the whole MEAN stack, as well as Ruby and RoR.

BA 2:1 (Geography)

University of Liverpool - Graduated 2012

● ABOUT ME

Adaptive front-end web developer experienced in JavaScript and with creating responsive applications. I am always interested in expanding my skillset.

In my current role I build new features using JavaScript, fix bugs and improve the speed and reliability of a web based web-app for the events industry.

I am passionate about developing interfaces that are highly useful but also look beautiful. I also have several years experience in customer service and sales working directly with customers and clients.
